\*Breezair has the highest cooling capacity (kW), based on test results of all major brands of evaporative air conditioners, performed by the NATA accredited Meridian Test Laboratory, to the requirements of the Australian Standard AS2913-2000 Evaporative Air Conditioning Equipment. All Seeley International air conditioner filters have smaller flutes than any other supplier of filter mediums, resulting in improved kW's of cooling. #The 7 year comprehensive warranty is available exclusively (i.e. only) from Seeley International participating dealers. The warranty has terms and conditions, including the requirement for servicing of the product in accordance with the owner's manual. In the fourth year the service must be performed by Seeley International or its appointed nominee. ^Through participating dealers only, for a limited period. See breezair.com.au for full terms and conditions. Information correct at time of printing, 14/09/2017.

# Cool your whole home from the cost of running a single light globe!

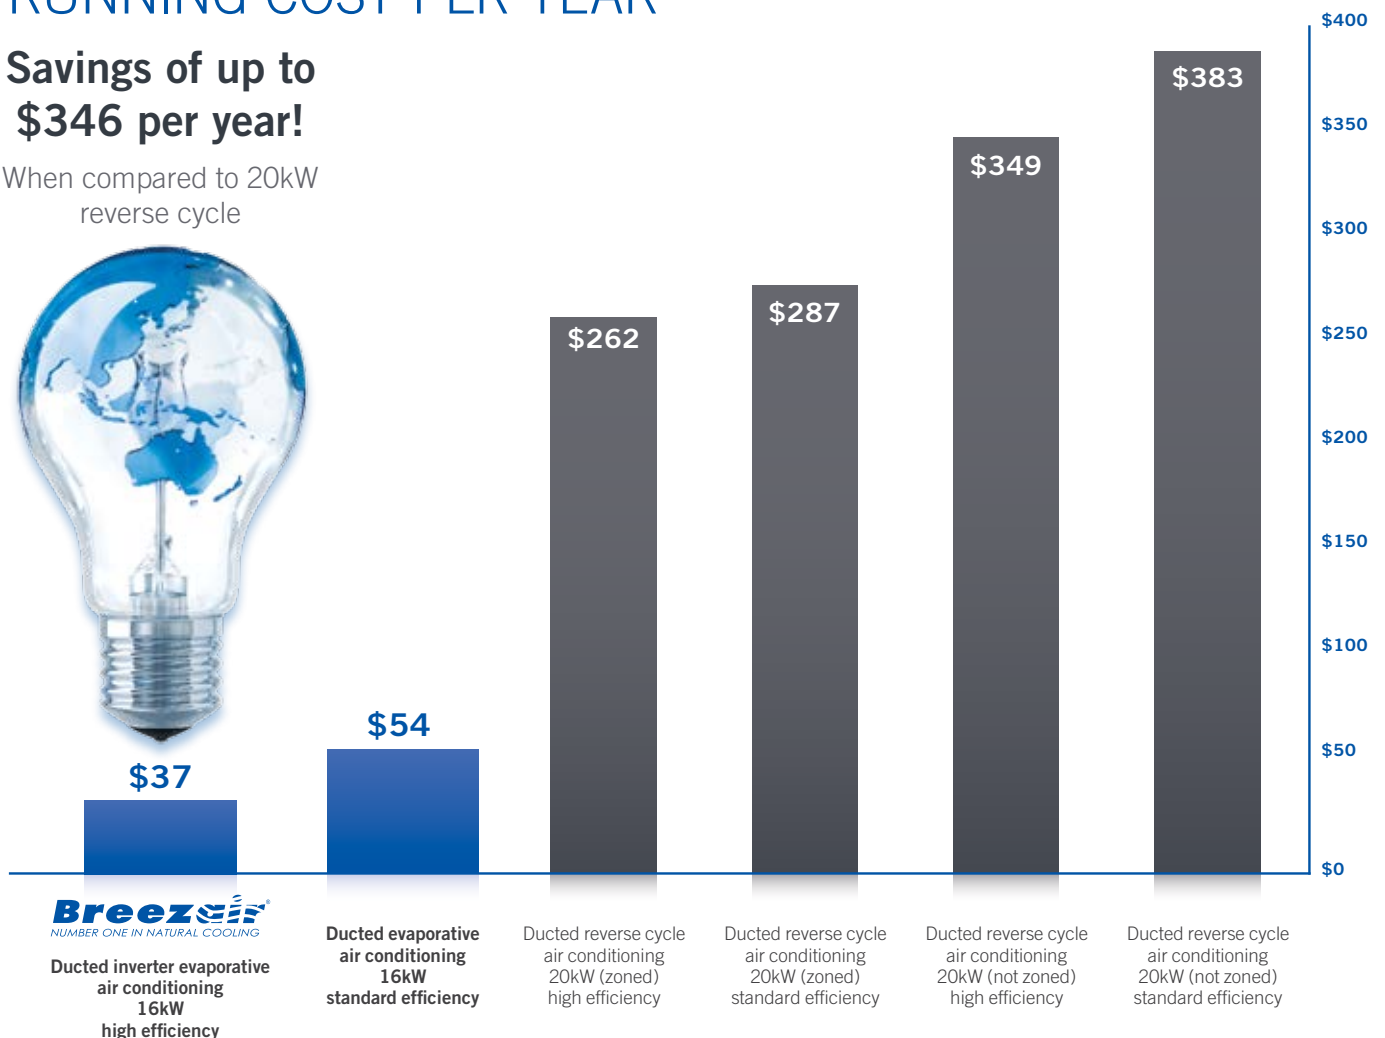

Breezair is the world's first inverter evaporative air conditioner and that means lower energy usage and running costs.

With energy prices escalating, evaporative air conditioning has a significant and increasing edge on reverse cycle, when it comes to energy efficiency, performance and easy living.

## RUNNING COST PER YEAR\*

**Savings of up to \$346 per year!**

When compared to 20kW reverse cycle

\*Seeley International's calculation, using publicly available data, compared to a 20kW standard efficiency (not zoned) ducted reverse cycle air conditioner system for a cooled area of 166m<sup>2</sup>. Assumes 300 hours usage, a 60% duty cycle for air conditioners, and an electricity tariff of 28 cents/kWh. Note that evaporative coolers also use some water.  
Correct at time of printing, 14/09/1207.
